PROFILE

Computer Science undergraduate with a strong interest in Artificial Intelligence, Machine Learning, Generative AI, and Full-Stack Development. Hands-on experience building AI-driven applications, SaaS platforms, and computer vision solutions using Python, TensorFlow, FastAPI, React, and modern web technologies. Eager to leverage technical expertise, creativity, and a product-oriented mindset to build scalable, impactful software

EDUCATION

B.Tech in Computer Science and Engineering, MLR Institute of Technology 2024 – 2028

CGPA: 8.54

Intermediate (MPC) — Score: 977/1000

SKILLS

Languages Python, Java, JavaScript, C, HTML, CSS

AI/ML Machine Learning, Deep Learning, Generative AI, TensorFlow, NumPy, Pandas, Matplotlib

Web React, FastAPI, JWT Authentication

Databases SQL, Firebase

Tools Git, GitHub, Google Colab, VS Code

EXPERIENCE

Student Council Member — Centre for Innovation & Entrepreneurship (CIE)

- Mentored 200+ students across technical domains, guiding project and startup ideas
- Organized technical workshops and innovation events to boost student participation

Freelance Web Developer

- Built responsive, production-ready websites end-to-end for multiple clients
- Worked directly with clients to translate requirements into working solutions on schedule

PROJECTS

ClientFlow AI — Developed an AI-powered CRM platform for agencies using Next.js, Supabase, Tailwind CSS, and OpenAI APIs. Implemented client management, project tracking, payment monitoring, and AI-assisted workflow automation to streamline agency operations.

Smart Expense Tracker — AI-powered expense management app built with React, FastAPI, SQL, and JWT authentication

Pothole Detection System — TensorFlow deep learning model that detects potholes from road images

Lagna Vastra Website — Responsive business website designed and built for a clothing brand

CERTIFICATIONS

Python — Intellipaat | Machine Learning — Intellipaat | Generative AI — Intellipaat
